

Archive ref.: Document in case no 2014/23

"Author side payments" is here meant to cover Article Processing Charge (APC) or similar charges in Open Access journals or similar series. A pre-requisite for funding is (normally) that the corresponding author has an affiliation with the University of Tromsø (UiT).

The application must be sent by e-mail to **postmottak@uit.no** with a copy to **fond@ub.uit.no**

Name of applicant: Elke Fasshauer
Position: Postdoc
Faculty/Institute/Unit : Department of Chemistry, CTCC
(If the applicant is a student/PHD-student, please also give us the thesis advisor's name and position:)

Is the applicant the corresponding author?

- ☐ Yes
☐ No, but another person affiliated to UiT is the corresponding author (please indicate name, position and unit in the "supplementary information" field below)
☐ No, the corresponding author is not affiliated to UiT. Please give more information and reasons to suggest the fund covers costs, in the "supplementary information" field below.

Article title: Non-nearest Neighbour ICD in Clusters: A Way to Distinguish Icosahedral and Cuboctahedral Clusters?

Journal name: New Journal of Physics

ISSN number: (This is the only unique identifier of a journal)

The journal is listed in [DOAJ](#) ☐ Yes ☐ No (explain below)

The journal is [accredited](#) ☐ Yes ☐ No, but has been suggested for accrediting. (Enclose documentation)

What kind of costs are covered by this application? (type of cost, name etc.) Article publication charge (gold open access)

Estimated amount in EUR 1560 (or in other currency, if so, indicate currency code)

Estimated date of payment 30.04.2016

If this date is exceed, the fund must be notified, otherwise the funding will be withdrawn. This is to ensure that articles not being accepted for publication will not tie up funds that should be allocated to new applications.

Does the research that the article is based upon have external funding?

- ☐ No
☐ Yes, but the external funding cannot cover these charges. Give more information below.

Additional information, comments, arguments etc.:

The manuscript refers strongly to a previous publication of mine, that was written together with experimental collaboration partners. Therefore, it would be nice to be able to publish this manuscript in the same journal. The publication fee given above is the charge for 2015. I could not find any information about a different fee for 2016 but there might be a change.

I confirm that the published article will be registered in Cristin as belonging (partially) to UiT, and that the published version will be uploaded there immediately upon publication.

Date: 09.12.2015
